

ADAM SHEA

Software Engineer

SUMMARY

Creative, detail-oriented software engineer with an interest in front-end development and making the web more inclusive. I'm looking to join a tech company who shares similar values to my own, where I can continue to learn and contribute to meaningful products.

WORK EXPERIENCE

Mailing & Systems Administrator - TigerPress

September 2007 — Present

- Carried a variety of roles throughout my time here, from production to project management, estimating and the latest being a mailing & systems administrator. All of these roles have provided me with a skillset well suited to software development.
- Contributed to writing technical documentation, flow charts, and templates for internal processes and work instructions
- Used third party software to create custom queries, programs and reports to help streamline our processes and help eliminate errors.
- Worked alongside our in-house developer to plan out an internal POS system that served as an intermediate layer for reps to use to create estimates and jobs.

Rob & Damia Design

August 2005 — September 2007

Handled basic production work at a small graphic design studio in Northampton, MA.

RECENT PERSONAL PROJECTS

Imposition Calculator - Created a visual imposition calculator to help determine printing layouts to help myself and others at my current role. This is something that did not exist within our space, and gets used every day. Utilized HTML, CSS, and Vanilla JavaScript.

Personal Website - My personal website, using React/NextJS, Framer Motion and Stitches CSS.
