ADAM SHEA

Software Engineer

SUMMARY

Creative, detail-oriented software engineer with an interest in front-end development and making the web more inclusive.I've always loved to build things and make them work, so I decided pursuing software engineering would be a great way to do it professionally.

I'm looking to join a tech company who shares similar values to my own, where I can continue to learn and contribute to meaningful products.

WORK EXPERIENCE

Mailing & Systems Administrator - TigerPress

September 2007 — Present

- Carried a variety of roles throughout my employment here, from production to project management, estimating and the latest being a mailing & systems administrator. All of these roles have provided me with a skillset well suited to software development.

- Contributed to writing technical documentation, flow charts, and templates for internal processes and work instructions

- Worked with third party software to create custom queries, programs and reports to help streamline our processes and help eliminate errors.

Rob & Damia Design | Boston, MA

August 2005 — September 2007

Handled basic production work at a small graphic design studio in Northampton, MA.

RECENT PERSONAL PROJECTS

Imposition Calculator - Created a visual imposition calculator to help determine printing layouts to help myself and others at my current role. Utilized HTML, CSS, and Vanilla JavaScript.

Personal Website - Basic personal website using React/NextJS, Framer Motion and Stitches CSS. This is a growing project and eventually will feature a portfolio of projects and a blog page that will push and pull to a database.
